

Guard Clocking System With LCD Display

GTP-6500D

USB cable (Pogo Pin Contacts)

GTP-6500D Color Screen LED Lighting Guard Tour System

Z-6500D are improved to pogo pin contacts. Which is more durable to provide a long time working life. It works with a built-in rechargeable battery, that reduced battery damage effectively. Besides, we had added flashlight function on Z-6500D reader, which is very helpful for night and dark place patrol, also avoid too much belongs security officers should carry while patrolling

Features

- > Multi-event optional
- > USB download data and charging 2 in 1
- > LED lighting can be used as a torch at night
- > Driver free, 10 times faster communication speed
- > 80,000 pcs mass memory capacity
- > 32,000 impact records prevent sabotage effectively

Specifications

Reading Method	RFID auto-induction	Dimension	130mm x 40mm x 25mm
	free from pressing any button	Working temperature	-40 C to 70 C
Storage capacity	80,000pcs	Working humidity	0 to 95%
Impact record capacity	32,000pcs	IP rating	IP 65
Communication	USB pogo pin contacts	Power consumption	10,000 times scan tag operation available
Direction	LED+Vibration+LCD	Battery	750mAh built-in rechargeable lithium battery
Event	30 pcs	Baud rate	115200Bps
	can be upgraded to 500 pcs	Net weight	170g
