

Magnetic Door Holder

DH-009

Work with all Kind of Single & Double Smokeproof Doors

Specifications

Dimensions	88x88x80mm	Suitable for	All Kind of Single & Double Smokeproof Doors
Holding Force	50kg	Surface Temp	<=20 C
Voltage	12V (24V customized)	Operating Temp	-10 C ~55 C (14°F-131°F)
Current Draw	12V/160mA 24V/80mA	Suitable Humidity	0-90%(relative humidity)

1. How to Install Magnetic Door Holder?

There are several types of magnetic door holders. You can place most door holders near the bottom or top of a door. Some models can be mounted on the floor. Door stops can be used in office or retail buildings and warehouses where a door needs to be kept open so traffic can pass in and out. Many are designed to hold self-closing doors and have powerful magnets. What you need is: door holder kit, a drill, and a pencil to complete this simple task.

2. how to test the Magnetic door holder?

Swing the door back until the door piece and the wall piece connect. Let go of the door handle. The magnets should hold the door in place if they are lined up correctly. The low power consumption, Highlights it more environment friendly and more durable. Professional anti-residual magnetism design ensures highest security. It will release automatically the fire door when fire alarms. It also contains build-out release button for testing and build-in MOV which reverse current protection.
