

## Tuya WIFI Gas Detector Sensor

Tuya-GAS

### What is gas detector sensor?

Gas sensors (also known as gas detectors) are electronic devices that detect and identify different types of gasses. They are commonly used to detect toxic or explosive gasses and measure gas concentration... This type of sensor employs a chemiresistor which comes in contact and reacts with target gasses.

### Specifications

<b>Input voltage</b>	DC5V (micro USB standard interface)	<b>Air pressure</b>	86-106Kpa
<b>Working current</b>	<150mA	<b>Working temperature</b>	0-55 C
<b>Response time</b>	<30s	<b>Relative humidity</b>	<80% (no freezing)
<b>Gas sensor lifetime</b>	3 yearsInstallation	<b>Unit weight</b>	0.26 kg
<b>type</b>	wall-mounted	<b>Product volume</b>	15.0*11.0* 6.0 cm

### Dimensions
